

MEMORANDUM

DATE: September 18, 2019

TO: Gray Construction

FROM: Brian Macanka
Field Representative Area 1

SUBJECT: Piedmont Timber Harvesting & Equipment Safety Training Record

Piedmont Timber Harvesting & Equipment became a policy holder with Forestry Mutual on September 30, 2016. The company has a great view on safety and works hard to keep a safe workplace. Since becoming a policyholder, we have worked together to create and implement Safe Work Rules specific to their logging operation. Piedmont Timber Harvesting also utilizes the North Carolina Logger Safety Checklist Booklet to manage their annual training requirements. This booklet keeps the crew up to date with all applicable OSHA safety requirements.

Forestry Mutual provided refresher chainsaw safety training to the crew on April 10, 2019. I have personally inspected their jobsite on numerous occasions and have never had a safety write-up. The crew understands the importance of safety and works hard to follow the managements direction. Piedmont Timber Harvesting is an excellent example of a safe modern logging operation that can handle most any situation.

Don't hesitate to contact me if you have any concerns.

Best Regards,

Brian Macanka
